

ACSI-ICM

29 November 1960

MEMORANDUM FOR: CHAIRMAN, NIS COMMITTEE

SUBJECT: NIS Chapter IX Production Forecast FY 1962 - FY 1963 (U)

1. The Department of the Army recommends the following changes in the subject forecast:

a. FY 1962 - Delete NIS 21 and NIS 7.

b. FY 1963 - Delete NIS 45 and NIS 18.

2. In order that maximum return be obtained from foreseeable production capacity, it is further recommended that the Chapter IX Subcommittee be directed to prepare as soon as possible outline guides in consonance with the revised Chapter IX Outline approved by the NIS Committee 25 October 1960. It is the view of the Department of the Army that the new outlines should be implemented on all NIS Areas programmed for initial production, beginning in FY 1962, and that they should be implemented as soon as possible on maintenance production. The Army Coordinator for NIS Chapter IX (Mr. Alvin Munn) is prepared to undertake, with the assistance of the Army Technical Services, development of those outline guides which would be an Army responsibility as soon as the Chapter IX Subcommittee initiates the required action.

3. In regard to the new Section 93, it is recommended that the Department of the Army be allocated the coordination responsibility for the section, and production responsibility for subsections A, General; B, Railroad Maps; C, Road Maps; D, Inland-waterway Maps and Charts; E, Telecommunications Maps; and F, Pipeline Maps. Production of that part of subsection E dealing with Postal Maps would appear properly to be a continuing production responsibility of CIA/ORA/DOC.
